To whom it may concern,

We highly recommend Tameshi Investment sp. z o.o. as a candidate for business cooperation.

This company provided us with advice on restructuring continuous delivery and continuous integration processes as well as presented valuable suggestions with respect to infrastructure design changes.

Tameshi successfully implemented ELK over a group of more than 100 servers, which provides our company with invaluable information on our resources usage and possibility of further resources optimization.

This business partner helped our company to automate the process of creating new environments for SAP Hybris. CI/CD chain, together with programmed environment creation and dedicated packages created by them, guaranteed that our production environments matched approved functionality every single time.

Tameshi professionally consulted design of a new AWS based architecture and processes. Their broad understanding of cloud technologies led to successful new architecture creation.

During our cooperation, Tameshi provided professional server support and updates connected with Atlassian deployments which ensures our business running as planned and without interruptions.

We are happy to recommend Tameshi as a business partner. In case of any questions, please do not hesitate to contact us.

Yours Sincerely

Steve Liddle
Managing Director
